EDUCATION

Pennsylvania State University

Dec 2023 – Dec 2025

Master in Software Engineering - GPA: 3.84

Syracuse University

March 2023 – Dec 2024

Master of Science in Computer Science - GPA: 3.97

University of South Florida

June 2015 – May 2022

Bachelor of Science in Information Science

Bachelor of Science in Integrative Animal Biology

EXPERIENCE

Complete Property Development

Margate, FL

Software Engineer

Jan 2023 – Present

- Analyzed the company's weekly reporting deficiency and identified areas of inaccurate reporting.
- Designed and developed an application using pandas, openpyxl, and tk, that automates the data aggregation and generation of excel reports, reducing labor from one week to a few minutes of work.
- Completely eliminated previous causes of inaccurate data reporting by unifying data sources.

Seminole and Orange County Schools

Orlando, FL

Substitute Teacher

June 2022 – Jan 2023

- Responsible for the safety, education, and guidance to students in grades 1-12 within classrooms consisting of more than 25 students
- Ability to adapt to multiple students issues and problems while in a new environment every single day

PROJECTS

Enhancing NFL Game Prediction Models

github.com/Predicting-NFL-Games 

- Improved an existing NFL prediction model through data preprocessing, yielding a 8.19% improvement in the Receiver Operating Characteristic (ROC) curve, a 4.75% increase in Accuracy Score, and a 1.31% improvement in the Root Mean Square Error (RMSE).
- Tools Used: Python, pandas, numpy, scikit-learn, matplotlib

Superhero Showdown

github.com/Higher-Lower-Game 

- An interactive web game that offers strategic team building and turn-based battles. Game stats are securely stored in user profiles with MongoDB and GraphQL.
- Tools Used: React, Node.js, Express.js, MongoDB, GraphQL, Apollo, Heroku

Crow

github.com/Desktop-Dashboard 

- A desktop application built with React and Electron that provides users with a customizable dashboard for storing macros and functions.
- Tools Used: Electron, React, Redux, Webpack, Babel, Node

Technologies

Languages: C++, Java, Python, JavaScript

Technologies: React, Node, Linux, git, bash, virtualization
